*Clips MB8®, PATENTED*

The MB8® garment bag have an exclusive patented retaining system which keeps clothes of different sizes and measurements flat and in place with the use of adjustable clips.

*Travel 360°*

This system also allows the MB8® garment holder to be rolled up and carried horizontally (backpack) so that the items inside arrive in perfect shape, as if they had just come out of the wardrobe!

## Italian Tradition

Today, Ludovico Marabotto is a company under full development, constantly responsive to customers' need, led by a team of experts for which teamwork and passion for the products created are the basic ingredients. The natural consequence of a winning idea, the intuition becomes a reality, transforming into a line of elegant and contemporary travel products characterised by meticulous care and original details, including the inner linings with their exclusive prints and patterns. All Ludovico Marabotto products are entirely made in Italy - the design, materials, craftsmanship - and strictly follow the strong principles of the tradition of Italian leather goods.

## The Idea

*Often ingenious solutions arise from a simple intuition.*

The MB8® garment holder is the only system that has a double retaining system on either side: the garments inside the bag are held in place by the hanger (retaining point) and the clips on the opposite side, which maintain the correct tension in order to keep garments in place.

This system also allows the MB8® garment holder to be rolled up and carried horizontally so that the items inside arrive in perfect shape, as if they had just come out of the wardrobe!

### *Italian Craftsmen, unique products*

This is also the secret behind the success of Ludovico Marabotto products: it is only possible to create a combination of details that best meets the needs of each customer through a handmade manufacturing process

# Leather & Materials

All the leather collections are made using quality materials from selected companies, that combine traditional techniques and contemporary innovation. The leathers used are very resistant, pleasant to the touch, with a richness of colour typical of established and prestigious Italian tanneries.
