# 2025

Founded in Omegna, Piedmont, in 1921 by Giovanni Alessi, following the local tradition of cold metalworking, the company has developed a policy of excellence that has made it a leading exponent of Italian Design Factories.

Over the years, Alessi has collaborated with over three hundred world-renowned designers and architects, producing thousands of objects, many of which have become icons of contemporary design. Being an emblem of ideational and industrial excellence Alessi has managed to combine the typical industrial needs of the sector with its soul as a "research laboratory on Applied Arts", open to the development of new creative and cultural horizons.
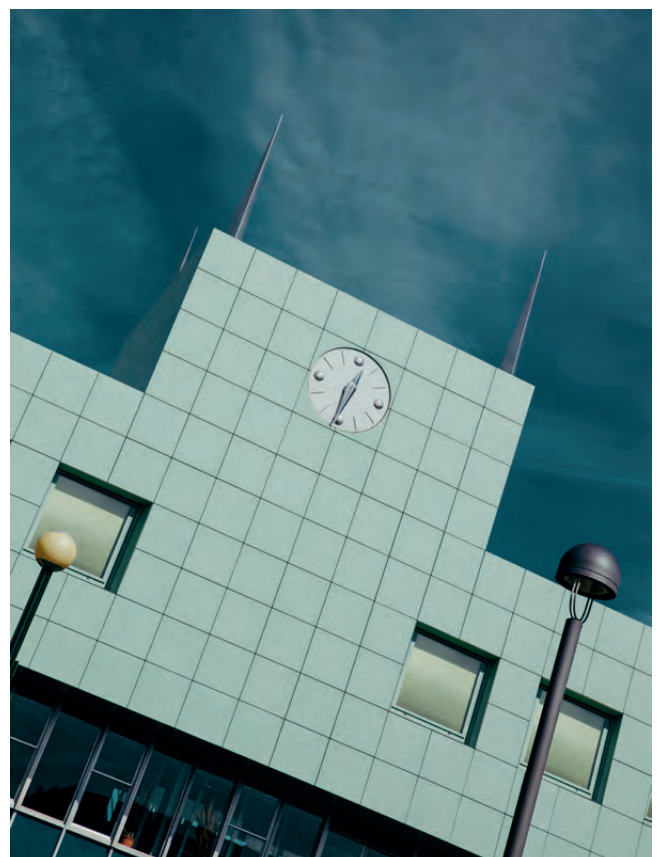

Since 2020, it has become a Benefit Corporation, identifying itself among companies that, in addition to profit, pursue one or more statutory purposes of common good, in a responsible, sustainable, and transparent manner. With this transformation, Alessi has completed a development process that has earned it B Corporation certification since 2017, becoming the first design factory in Italy to achieve this recognition.

**Certified**

**B Corporation**

In 2024, Alessi proudly announced the renewal of its B Corp certification, maintaining its status as the only Italian design company to achieve this accreditation. Being a B Corp means being part of a global movement that goes beyond measuring economic results, striving to maximize positive impact on employees, communities, and the environment, using business as a regenerative force for society and the planet.

PRODUCT

## Electric kettle with temperature control.

INTRODUCTION

**A TAILOR-MADE KETTLE**
The Plissé kettle combines functional aspects with a sculptural and fascinating design: like a fabric transformed into a three-dimensional object by a tight fold, this kettle is reminiscent of a haute couture dress, a beautiful object that turns the kitchen shelf into a stage. The new version has a temperature control option, which extends the range of applications and offers the ideal solution for all cases in which the water should not be boiling hot.

## Electric kettle and toaster.

| INTRODUCTION |
| --- |

**ELEGANCE TAKES ON A SHADE OF BLUE.**
The Plissé kettle and toaster already reveal the essence of their distinctive design in their name: elegant and lightweight, like haute couture garments. These are objects where functional aspects are transformed into a series of formal details with captivating lines. Among the first members of a collection that quickly captured public interest since its debut in 2018, they now come in a new color: a textured and elegant blue that evokes the world of architecture, the domain of their creator. Magnificent pieces designed to stand out proudly on any kitchen counter.

## Salt, pepper and spice mill.

**SCULPTURAL RITUALS AT THE TABLE**
Seasoning a dish with salt or pepper is a familiar table ritual, whereby the mill is held with both hands and the seasoning is performed with a very tactile gesture. Michele De Lucchi approaches this typology by remaining faithful to the classical mechanics of torsion. He expresses his skills as a wood sculptor through the choice of an essence such as beech, an expressive language that he has been cultivating since the early 2000s. This resulted in two universal mills that differ in shape but have the same technical solutions. The deliberately small objects should not dominate the table or restrict the socializing space. The fine finish with natural oil, which makes each piece unique and pleasant to the touch, is a tribute to craftsmanship.

## PRODUCT

## Tray and basket.

## INTRODUCTION

**REDISCOVERING THE FUTURE**
Archivio is a collection taken from the Alessi catalog and is based on the designs kept in the company museum. The Alessi Museum, established in 1998 in the Crusinallo di Omegna factory, has collected objects that embody more than a century of research in the field of applied arts and have been produced by the company from 1921 to the present day. With more than a thousand authors represented in its collection, the museum offers an impressive cross-section of 20th and 21st century design. A rich reservoir from which Alessi can draw to open up new terrain, as in early 2025 with the new edition of the Arran tray by Enzo Mari and the Maya basket by Giulio Confalonieri.

## DESIGN

## Enzo Mari
## Giulio Confalonieri

## BIO
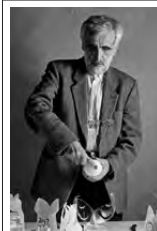

Enzo Mari

Born in 1932 in the province of Novara, the artist began his work with research into visual perception and later turned his attention to children's games, graphics, design and architecture. The five-time Compasso d'Oro award winner has been described as "the critical conscience of design" and is regarded as one of the leading theorists in this field. His works are exhibited in the world's leading art and design museums; he is the author of several essays, including "Project and Passion". He has worked with leading design companies. He has developed some of his most popular and radical designs for Alessi, such as Ecolo: flower vases that you can also make yourself by recycling plastic bottles. He passed away in 2020.

Giulio Confalonieri

Born in Milan in 1926, the designer and graphic artist was one of the leading representatives of the "Swiss School" in Italy in the 1950s. He worked in editorial, advertising and corporate graphics and is characterized by a style with a strong visual impact and dynamic composition based on the contrast between positive and negative elements. He helped shape the image of important companies and institutions. His numerous honours include the gold medal of the 11th and 15th Milan Triennale and the Typomundus Diploma of Honour in New York, awarded "for an outstanding contribution to the development of 20th century graphic art". His works can be seen in various international art museums. He passed away in 2008.

# La cupola

PRODUCT

## Espresso coffee maker.

INTRODUCTION

**ONE ESPRESSO COFFEE MAKER FOR ALL**
The La cupola espresso coffee maker, a miniature monument so to speak, Symbolizes the exquisite dialectic relationship between architecture and the home that Aldo Rossi has traced over the years. An espresso coffee maker that is simultaneously a temple, tower and basilica celebrates the coffee ritual and follows the dream of a domestic environment That is a planned and constructed analog to urban space. It is an icon of contemporary industrial design, now available in a version suitable for induction hobs and, as with the original edition, in two Color variants: with a black or blue handle and knob.

DESIGN

## Aldo Rossi

BIO

Aldo Rossi

Born in Milan in 1931, the artist is considered by many to be the greatest Italian architect of the second half of the 20th century. His intensive theoretical and academic activities have always gone hand in hand with architectural practice. His strict language of primary forms, geometries and poetic allusions between neo-liberalism and post-modernism is Recognizable in the numerous buildings he has realised all over the world, from France to Germany, from Japan to the USA. He was the director of the Venice Architecture Biennale and the first Italian to receive the prestigious Pritzker Architecture Prize. For Alessi, he designed timeless products such as the La conica and La cupola coffee machines. He passed away in 1997.

# Buri

---

**PRODUCT**

## Thermo insulated tumbler.

**INTRODUCTION**

**AN INNOVATIVE SIP**
A thermo tumbler for everyday life, a new typology in the Alessi catalog. Buri combines the immediacy of a simple tumbler with the insulating properties of a thermos flask. Buri is designed for use near the place of preparation and not for transport. It is the ideal solution for keeping water, coffee or tea at the right temperature so that they can be consumed over a longer period of time. The Korean studio BKID has taken an elegant and functional approach to the Realization of this project: the profile of the steel body is reminiscent of a slender beak, which enlivens the overall shape and hints at a mouthpiece. The lid is fitted with a cap that ensures a fascinating and unusual drinking experience with every sip.

# Anna Stick - Alessandro Stick

## PRODUCT

## Set of two chopsticks.

## INTRODUCTION

**ICONS Traveling TO THE EAST**
The blurring of borders has brought about an enormous change in food culture: local traditions have been joined by cuisines from other countries, and this mixture has created the need to enrich the range of classic tableware with ideas from different cultures. This is the case with the spread of oriental cuisine, which has brought the use of chopsticks to the tables of half the world, ideal for savoring the dishes of this rich gastronomic tradition. The double pair Anna Stick and Alessandro Stick comes from the archive of unrealized projects by Alessandro Mendini: ebony chopsticks decorated with a cast steel figure representing the Milanese architect's two iconic figures. This includes a fish-shaped table stand, also made of micro-cast steel, which refers directly to one of the many elements formalized in Mendinigraph, Mendini's design alphabet.

## DESIGN

## Alessandro Mendini

### BIO

Alessandro Mendini

Born in Milan in 1931, the artist was one of the leading innovators of Italian design. The internationally renowned architect, artist, designer and theorist was editor of Casabella, Modo and Domus. His most important buildings include the Groningen Museum in Groningen, the Casino in Arosa and the Korean headquarters of the Triennale in Milan. He has been honoured with the Compasso d'Oro three times and has worked with companies all over the world. His collaboration with Alessi helped to transform the company into one of the factories of Italian design: as a meta-projective consultant - the Tea & Coffee Piazza project being one prime example - he designed the Alessi Museum, the extension to the Omegna headquarters and iconic objects such as the Anna G corkscrew. He passed away in 2019.

# Toru

## PRODUCT

## Electric kettle, citrus-squeezer and toaster.

## INTRODUCTION

**THROUGH THE MATERIAL**
Toru, the stainless-steel appliance series designed by Nendo for Alessi, is a wonderful expression of the skill and care with which the company handles this material. "Toru" means "through" in Japanese and is a subtle reference to the black, tube-like elements that characterise the various objects in the collection. These elements fit elegantly into the stainless-steel body, acting sometimes as a spout, sometimes as a handle, to create a composition of cleverly ironic volumes.

## DESIGN

## Nendo

## BIO

Nendo

Design studio founded in 2002 with offices in Tokyo and Milan. The name, which means "modelling clay" in Japanese, expresses the stretchy and flexible approach of the company's own design. The studio has worked with numerous international companies and designed objects and furniture, exhibitions and galleries. Its best-known works include the design of the Olympic cauldron for the 2020 Olympic Games in Tokyo, its involvement in the design of the 5th Olympic Games and the design of the new Olympic Stadium. Generation of the French TGV high-speed train and the design of the Japanese pavilion for the 2025 World Expo in Osaka. Works by Nendo can be found in museums all over the world. It has received several awards, including the Good Design Award.

# Plissé - New addition

PRODUCT

## Portioned capsule coffee machine, capsule holder and capsule crusher.

INTRODUCTION

**HAUTE COUTURE ELECTRICAL APPLIANCES**
Plissé - this product's very name declares the sculptural nature of its design: like a fabric that a thick pleating transforms into a three-dimensional shape, these objects are reminiscents of an haute couture dress. Designed by Michele De Lucchi, the Plissé collection combines functional aspects with a plastic and fascinating design that reveals the creator's architectural background, as well as his passion for the handicraft and for sculpture. Like a dress sculpted by a fashion designer, these are beautiful objects to be left on display on your kitchen top.

## PRODUCT

### Corkscrew in AlkiPaper® and chrome-plated zamak. Pattern design by Arthur Arbesser.

## INTRODUCTION

**A NEVER-ENDING STORY**
To celebrate the anniversary of this pair, Alessi embarked on a creative and technological exploration, a project that goes beyond giving the two characters a new look and renews their substance by using AlkiPaper®, an innovative biocomposite. Starting from the concept of hybridization, a recurring theme in Mendini's work, we involved three different talents coming from the worlds of fashion, graphic design and painting: Arthur Arbesser, Studio Temp, and Fulvia Mendini. Arthur Arbesser's new design for Anna G. and Alessandro M. reflects his unmistakable style, which combines influences from the art and architecture of his home city of Vienna with a contemporary and modern sensibility. In his personal interpretation of the clothing of the two famous corkscrews, Arbesser focuses on clear lines and unexpected color combinations, which also represent the hallmarks of his collections. The result is garments that are visually appealing and structurally interesting. A fascinating change of apparel that combines the world of design with the original expressiveness of one of the most interesting, talented designers in contemporary fashion. These special editions are accompanied by exclusive versions, each made in only nine numbered pieces and an author's proof.

## DESIGN

### Alessandro Mendini
### Arthur Arbesser

## BIO

**Alessandro Mendini**
Born in Milan in 1931, the artist was one of the leading innovators of Italian design. The internationally renowned architect, artist, designer and theorist was editor of Casabella, Modo and Domus. His most important buildings include the Groningen Museum in Groningen, the Casino in Arosa and the Korean headquarters of the Triennale in Milan. He has been honoured with the Compasso d'Oro three times and has worked with companies all over the world. His collaboration with Alessi helped to transform the company into one of the factories of Italian design: as a meta-projective consultant - the Tea & Coffee Piazza project being one prime example - he designed the Alessi Museum, the extension to the Omegna headquarters and iconic objects such as the Anna G corkscrew. He passed away in 2019.

**Arthur Arbesser**
Born in Vienna, Arthur Arbesser was deeply immersed in the city's history and culture as he grew up. After graduating from London's Central Saint Martins College he moved to Milan to work for a leading fashion house for several years. Subsequent to launching his label and being a finalist of the 2015 LVMH prize, he quickly became recognized for his graphic aesthetics and personal design language. Aside from his namesake label, Arbesser is a creative consultant and also works on numerous collaborations from furniture to product design. Costume design for ballet and opera complete his creative world.

PRODUCT

## Corkscrew in AlkiPaper® and chrome-plated zamak. Pattern design by Studio Temp.

INTRODUCTION

**A NEVER-ENDING STORY**
To celebrate the anniversary of this pair, Alessi embarked on a creative and technological exploration, a project that goes beyond giving the two characters a new look and renews their substance by using AlkiPaper®, an innovative biocomposite. Starting from the concept of hybridization, a recurring theme in Mendini's work, we involved three different talents coming from the worlds of fashion, graphic design and painting: Arthur Arbesser, Studio Temp, and Fulvia Mendini. The creative trio from Studio Temp draws from the deep reservoir of street art to create a contemporary and cryptic interpretation of the two iconic corkscrews by Alessandro Mendini. The graphics presented are the result of a personal imprint full of eclectic ideas, ranging from street signs to modern data protection techniques. As a tribute to the professional career of the father of one of the three designers, a radiologist, the decoration contains phosphorescent elements that are only visible in the dark. A surprising juxtaposition of references and memories, a deconstructed puzzle that immediately creates order again when the light goes out.
These special editions are accompanied by exclusive versions, each made in only nine numbered pieces and an author's proof.

## PRODUCT

## Corkscrew in AlkiPaper® and chrome-plated zamak. Pattern design by Fulvia Mendini.

## INTRODUCTION

### A NEVER-ENDING STORY

Alessi embarked on a creative and technological exploration, a project that goes beyond giving the two characters a new look and renews their substance by using AlkiPaper®, an innovative biocomposite. Starting from the concept of hybridization, a recurring theme in Mendini's work, we involved three different talents coming from the worlds of fashion, graphic design and painting: Arthur Arbesser, Studio Temp, and Fulvia Mendini. To celebrate the iconic pair of corkscrews designed by her father Alessandro, Fulvia Mendini has imagined a fairytale in an oak forest in which the two characters dance in an endless search for desires and secrets. This resulted in two new tree dresses, two eye-catching patterns that emphasise the soft and delicate design of these iconic corkscrews. These special editions are accompanied by exclusive versions, each made in only nine numbered pieces and an author's proof.

Fulvia Mendini

Fulvia Mendini was born in 1966 in Milan, where she also lives and works. After studying illustration and graphics at the European Institute of Design, she worked at Atelier Mendini and co-operated with various companies. She then embarked on a personal artistic and decorative research journey, focussing primarily on the world of nature and portraiture. Her design language is influenced by the world of graphic design and the tradition of arts and crafts. Her works have been shown at the Grand Palais in Paris, the Triennale in Milan, the Biennale in Prague and in numerous galleries and have been included in the collections of the Byblos Art Hotel in Verona and the Stazioni dell'Arte Salvator Rosa and Mater Dei della Metropolitana di Napoli. Since 2019, she has been managing her father Alessandro Mendini's archives and studio together with her sister Elisa.

# Tsumiki

PRODUCT

## Portable lamp.

INTRODUCTION

**A LUMINOUS IDEA**
"Tsumiki" is a Japanese board game in which the aim is to build three-dimensional shapes from simple wooden blocks. The countless combinations of shapes inspired by the game are shown to their best advantage in the lamp designed by Medum and ensure a wide range of possible uses. The first impression is that of a typical table lamp with simple, fresh shapes. In reality, the head, stem and base are three independent elements that are connected by a sophisticated magnetic coupling technology and offer numerous possible combinations. The lamp is therefore suitable for a variety of contexts and can be customised according to the desired function both at home and at the workplace. A wireless all-rounder that fits into today's world.

DESIGN

## MEDUM

BIO

MEDUM

MEDUM is a Japanese design studio founded by Shintaro Monden. The studio provides a full range of capabilities, from discovery of client issues to prototype testing, product design, and branding design. Regardless of whether it's hardware or software, they have succeeded in collaborating with leading brands both domestically and internationally. The products developed by the studio have won numerous prestigious design awards, including the iF Gold Award and Cannes Lions Design Gold. Additionally, their works has been selected for the permanent collections of renowned museums around the world, such as the Pinakothek der Moderne and the Design Museum Danmark.

## Gift sets.

| INTRODUCTION |
| --- |

**A GIFT FOR YOU!**
Alessi Gift Set offers a selection of essential items for the preparation and serving of traditional dishes and beverages: from pasta to coffee, everyone can find the perfect gift for their loved ones based on their tastes and preferences. Alessi Gift Set is a gift to express a heartfelt and personal thought. "The act of giving a gift has always been an important and meaningful gesture in human history, surrounded by mysterious and complex rituals. However, in the contemporary world, these rituals have become increasingly sophisticated. We know well how many of our products often find their purpose as gifts. The aim of the gift packaging project is precisely to emphasize this aspect of our products, their 'gift' identity. The Alessi Gift Sets are elegant boxes that present the objects according to functional themes (coffee, cocktails, wine service, etc.). Equipped with an interior, they allow for a beautiful display in a shop window while also being reusable at home as containers." Alberto Alessi

# Delight

## Mug, biscuit jar, bon bon container, Christmas baubles.

**A TRADITIONAL YET TRENDY DREAM**
With the Delight collection, Nika Zupanc presents us with a series of Christmas-themed objects, interpreting traditional symbols such as the Christmas tree and the star in her distinctive, trendy style. Inspired by classic Christmas iconography, which often features colors such as white, red and gold, the designer has created a collection comprising a selection of hand-blown glass baubles, a mug, a biscuit jar and a sweet jar. Dreamy objects whose original design language elicits a joyful dialogue between tradition and modernity.

## Nika Zupanc

Nika Zupanc

Zupanc was born in Ljubljana, Slovenia, where she graduated with honours from the Academy of Fine Arts and Design. In 2008, she began her own design studio, soon becoming known for objects that "defy rationality, sobriety and pragmatism to promote intuitiveness, eclecticism and intimateness," as she says. She collaborates with prestigious design companies while also creating for her own brand. The international press has expressed interest in her work by describing it as "punk elegance" and "techno chic". Several of her projects have been honoured with awards.

# New addition

**PRODUCT**

## Figurines.

**INTRODUCTION**

**ETERNAL WISHES OF HAPPINESS**
Massimo Giacon and Marcello Jori merge their artistic talents in a special project that bears both their names: the Happy Eternity Baby crib. The two designers have divided the nativity scene into groups of porcelain figures – the Holy Family, the ox and the donkey, the Three Kings, the comet, the Angel, the shepherd boy, the sheep – surprising with an object that embodies the rich emotional content of their artistic creation.

**DESIGN**

## Massimo Giacon
## Marcello Jori

**BIO**

Massimo Giacon — Born in Padua, Italy, in 1961, comic-strip artist and illustrator, a leading light in the renewal of Italian comic, he divides his time as a graphic artist, designer, musician and artist.

Marcello Jori — Marcello Jori was born in 1951. He currently lives and works in Bologna. Having obtained his degree from DAMS (Drama, Art and Music Studies, Bologna), in 1977 Jori embarked on his career as an artist, exhibiting in national and foreign galleries and museums. In 1979, Jori painted himself on top of a ladder painting the fall of the angel, which marked a turning point in his artistic career. During this phase painting became central to his creative evolution. These were the years of the Scritture (Inscriptions), fluctuating words which were then caged in multicoloured Teatrini (Theatres), Cristalli (Crystals) and Gioie (Jewels) series, enchanted and kaleidoscopic geometric patterns.

PRODUCT

## Baskets.

INTRODUCTION

**TRADITIONAL YET MODERN**
Inspired by traditional, woven wicker baskets, Michel Boucquillon and Donia Maaoui have created a novel and original object that charmingly plays with the shapes of this traditional handcraft. The Vimini basket stands out thanks to its sophisticated design: After being cut with a laser, the sheet steel is moulded in a series of mechanical production steps that once again rely on the Alessi workshops' skill to process this metal.

DESIGN

## Boucquillon & Maaoui

BIO

**Boucquillon & Maaoui**

Michel Boucquillon was born in Belgium in 1962. In 2000, he opened a new workshop dedicated to Industrial Design and experimental Architecture in Lucca-Tuscany in his "Casa Boucquillon", an extremely experimental place of exploration, meditation, life and work. Michel Boucquillon actually works for the world most famous International Design companies. His work is present in several Museums and got many of the main international Awards.
Donia Maaoui, Michel's wife and an architect herself, works alongside her husband on some of design projects, like the ones created for Alessi, although her principal occupation is cast bronze sculpture and painting.

## Pepper mill and nutcracker.

INTRODUCTION

**THE CONTEMPORARY ESSENCE OF WOOD**
A pepper mill and a nutcracker are the latest additions to the series of re-releases of wooden objects designed by Ettore Sottsass for Alessi starting in 1989. The colors of the first edition are joined by surprising new juxtapositions that offer us a new and exciting full immersion in the chromatic language of one of Italy's greatest designers.

DESIGN

## Ettore Sottsass

BIO

**Ettore Sottsass**

Born in Innsbruck in 1917. He is internationally recognised as one of the innovators of design and architecture in the second half of the 20th century, thanks to whom the rigid functionalism of the previous decades was overcome. He is regarded as an influential teacher whose language, in keeping with the principles of Radical Design, opposes any intellectualism and rigidity with the energy potential and vitality of the drawings and colors.  His works are exhibited in the world's most important museums of design and contemporary art. Over the course of his long career, he received numerous prizes and awards, including four Compasso d'Oro, including one for the Nuovo Milano cutlery designed for Alessi. He passed away in 2007.

**PRODUCT**

## Espresso coffee maker.

**INTRODUCTION**

A STEEL SCULPTURE
Starting from the 9090, designed by Richard Sapper in 1979, Alessi has created a series of espresso coffee makers that over time have become iconic objects. With the Menhir espresso coffee maker, the company boldly returns to that tradition, presenting an object with consummate, clean, concise lines. The name Menhir immediately brings to mind the power of a form with great emblematic presence: for a new design ritual.

## Michael Anastassiades

**BIO**

Michael Anastassiades

Born in Cyprus in 1967, he studied civil engineering and industrial design in London, where he opened his studio in 1994. His products, environmental design projects and experimental works often cross the boundaries between different creative fields. His work encompasses both industrial production and craftsmanship and is guided by a poetic yet rigorous interpretation of technology, materials and function. He has received numerous prizes and awards, including a Compasso d'Oro. His works are exhibited in major international museums such as the MoMA in New York and the Victoria & Albert Museum.

# Eugenia

---

PRODUCT

## Set of glasses.

INTRODUCTION

**THE SIMPLICITY OF A CURVE**
Eugenia is a set of glasses, complete with a jug and decanter, designed to cater to every requirement of contemporary dining. The name is a direct tribute to Alberto Alessi and his passion for wine which culminated in the founding of the company "La signora Eugenia e il passero solitario", whose products come in a bottle inspired by a design by Leonardo da Vinci. Taking his cue from the iconic shape of the winery's bottle, Fukasawa developed a set characterized by pure, essential design, featuring a line with an obtuse angle, "Donkaku" in Japanese, which becomes the formal characteristic of the entire set.

# Itsumo - Yunoki ware

**PRODUCT**

## Set in white porcelain or white porcelain with decoration.

**INTRODUCTION**

**DESIGN AND FORM**

Itsumo, which in Japanese means "everyday and forever", is the new porcelain tableware set designed by Naoto Fukasawa. A curved line with an obtuse angle, "Donkaku" in Japanese, becomes the distinguishing feature of the various elements of the set, created by the designer with particular attention to tactile quality, so that the objects are pleasing and interesting to touch, feel and caress with even the lightest touch. Itsumo's minimalist design is elevated with the addition of a decorated version, the result of the designer's collaboration with the ultra-centenarian artist Samiro Yunoki. A project that embodies all the attention to detail and the poetry of Japanese culture. The set, available with or without decoration, allows you to mix and match elements to create your own personal service.

**DESIGN**

## Naoto Fukasawa
## Samiro Yunoki

**BIO**

Naoto Fukasawa

Born in Kōfu, Yamanashi Prefecture, in 1956, he began his professional career with companies in the electronics industry after studying art and design. In 2003, he opened his own design studio in Tokyo. He has executed projects for major international brands and has worked as a consultant for leading companies in numerous industries. His work is shaped by the quest for absolute simplicity in order to create harmony between people, objects and spaces. He has received several awards, including the Isamu Noguchi Award. He has been the director of the Museum of Japanese Folk Crafts since 2012. He is a professor of integrated design at Tama Art University and has received numerous awards, including the Isamu Noguchi Prize.

Samiro Yunoki

Samiro Yunoki was born in Tokyo in 1922. He enrolled in the Department of Aesthetics and Art History, Faculty of Letters, Tokyo Imperial University and in 1946 began working at the Ohara Museum of Art, where he encountered "Mingei" Japanese folk crafts by Soetsu Yanagi. This inspired him to abandon his job and begin studying under Keisuke Serizawa in order to become a dyeing artist. In 1972 he became a professor at the Joshibi University of Art and Design and was subsequently appointed president in 1987. He has held shows and exhibitions in numerous national and international museums.

---

| PRODUCT | INTRODUCTION |

## Cookware set.

**A COLOR FOR EVERY UTENSIL**
The unmistakable design approach of Giulio Iacchetti culminates in a collection of cooking utensils whose design is as elegant as it is simple and minimalist. Made of recycled aluminium, the Tama set, with its essential but complete range of utensils, aims to cater to all contemporary cooking operations. The designer chooses different colors for the various elements in the set, creating a multicolored yet harmonious composition capable of interacting with different styles of kitchen.

## Giulio Iacchetti

| BIO |

Giulio Iacchetti

An industrial designer since 1992, Giulio Iacchetti works for various Italian and international brands. Among the distinctive features of his work is the search for new types of objects such as the Moscardino designed with Matteo Ragni, awarded the Compasso d'Oro in 2001. In 2009 he received the Premio dei Premi for innovation from the President of the Italian Republic and in 2014 he won a second Compasso d'Oro for a series of manhole covers designed with Matteo Ragni. For Alessi he has designed products that have been immediately appreciated by the public, such as the Noè series of objects dedicated to wine.

## Kitchen tongs.

**BLACK AND METAL**
Designed by Elisa Giovannoni, the Domenica kitchen tongs combine elegant, contemporary design with careful study of functional details. The main structure of the tongs is in polyamide and the handle is clad with polished stainless steel for greater rigidity and stability during use, emphasising the superb quality of this utensil, also in terms of visual appeal: the contrast between the two materials creates an object that is both simple and elegant.

## Elisa Giovannoni

Elisa Giovannoni

Elisa Giovannoni was born in Pordenone in 1960. She specialised in industrial design at Milan's Scuola Politecnica di Design and from 1986 to 1991 collaborated with Michele
De Lucchi. A founding partner of Giovannoni Design, she collaborates with Alessi and other
important sector companies. She has received numerous prizes and awards for excellence in
the field of design. In addition to her work as a designer, she teaches at the Domus Academy and Scuola Politecnica di Design.

## Kitchen tongs.

**INTRODUCTION**

**ESSENTIAL UTENSILS**
Pritzker Prize winner David Chipperfield offers us his own personal interpretation of traditional kitchen utensils: ladle, spatula, tongs and skimmer. He moulds pure, minimalist geometries, with a special focus on the crowning element which becomes, in its different variations, the hallmark of the set. In addition to the usual items, the Convivio kitchen utensil service features kitchen tongs: essential for handling and serving food with precision and simplicity. The kitchen tongs are also sold individually.

# Away

## PRODUCT

## Thermo insulated bottle.

CLIP TO GO

With Away, Alessandro Stabile brings us a new and personal interpretation of a traditional vacuum flask: a very popular type of product nowadays, which people carry with them all day long, while at school, work or enjoying leisure activities. Stabile presents a truly original project in which the concise, pure design of the container is punctuated by the key feature of the lid: an iconic and functional comma-like curl that allows the bottle to be clipped to a belt, the side of a bag or the grab-handle of a backpack.

## DESIGN

## Alessandro Stabile

### BIO

Alessandro Stabile

Designer and art director, he founded his studio in Milan in 2011. His designer work seeks new points of balance between technical, typological, and formal innovation, with projects that challenge established certainties, interpreting day-by-day opportunities to deliver furnishings or products imbued with effortless elegance. He directs the drive for technological innovation by simplifying interaction and working on what shapes communicate. Advocating for circular design, Stabile looks at his projects as a synthesis of respect for the environment, the processes, and the people involved in the production and consumption of a product. He works for prestigious international brands and has received several awards including the Archiproducts, Red Dot, and IF Design Award, as well as nominations for the Compasso d'Oro.

# Plissé collection

A collection that quickly captured public attention, selling an extraordinary number of pieces since the release of its first product: a kettle with elegant pleated lines, like a designer dress. The small appliances created by Michele De Lucchi with the Plissé series have undoubtedly established themselves as true 21st century design icons. A line of haute couture appliances dedicated to enthusiasts of timeless shapes, in design, art, and fashion: the Plissé collection has an unmistakable soul and look that will definitely appeal to those who love to surround themselves with contemporary objects with distant roots.

# Small electrical appliances

INTRODUCTION

The small kitchen appliances from Alessi represent a successful combination of innovative design and functionality. Created by some of the company's most talented designers, the objects not only simplify life in the kitchen, but are also durable and make everyday tasks a pleasant and inspiring experience. The small kitchen appliances from Alessi are also ergonomic, easy and intuitive to use. Practical and with original shapes reminiscent of small sculptures or domestic architecture, these objects are both decorative and functional elements that enhance the kitchen environment.

# Tea & Coffee

Alessi has been producing objects and accessories for making coffee, tea and breakfast since the 1920s. From the 1970s onwards, the Alessi catalog was enriched with espresso coffee makers, kettles and other products designed by exceptional creatives who completely renovated the design. Even today, Alessi still offers new models with surprising shapes, such as the David Chipperfield-designed Moka espresso coffee maker, whose body has eleven sides and yet is a familiar, albeit innovative sight - or the Ossidiana designed by Mario Trimarchi, which was awarded the Compasso d'Oro.

# Table Accessories

INTRODUCTION

Alessi has been producing objects for table service since it was founded in 1921. In the early catalogues of the company there was a dense sequence of articles for the supply and handling of food, water and wine during lunch. An important chapter in this long production tradition is seasoning cruets, trays and baskets, which have always been available in various designs, e.g. as fruit bowls, cups and centrepieces. These objects were soon enhanced by sophisticated openwork decorations, which still adorn baskets and trays today in a thoroughly contemporary style and are one of Alessi's outstanding features. The catalog offers a wide and varied selection of table accessories. Among these are several families of objects that share the same design language. For example, the Bark series by Michel Boucquillon and Donia Maaoui includes centerpieces, baskets and flower pots. The Cactus! series by Marta Sansoni and LPWK features baskets, seasoning cruets and napkin rings. The series by Lluís Clotet ranges from trays to antipasti dishes. Mediterraneo, designed by Emma Silvestris, offers a family of baskets, fruit bowls, candle holders and serving cutlery. Another example is La Stanza dello Scirocco by Mario Trimarchi.

# Kitchen accessories

There are countless aids for organizing, processing and storing food and drinks before and during lunch. Kitchen accessories are an indispensable component in this area. The Alessi catalog offers a wide range of items here: from glasses to paper roll holders, from timers to pasta tasters, from lemon squeezers to kitchen cutlery. Created by some of the most interesting contemporary designers, these typologies become furnishing elements that enliven the space dedicated to food preparation and contribute to the convivial dimension that increasingly characterises the kitchen environment.

# Tableware

The plates and glasses from Alessi reflect the best that contemporary design has produced over the last thirty years. An extraordinary variety of designers have assisted Alessi in exploring the world of porcelain and glassware: from Italian masters to international designers such as Jasper Morrison, Naoto Fukasawa or Stefano Giovannoni to world-famous architects such as Toyo Ito or David Chipperfield. Their ingenuity has produced a collection of objects that can be combined in different ways to create either a simple, informal table for a quick lunch or a sophisticated, sumptuous and eclectic mise en place.

# Cutlery sets

INTRODUCTION

The Alessi catalog offers a wide range of cutlery series created over the last four decades by some of the most talented international designers. Alessi cutlery is made exclusively from stainless steel, the quality of which, together with careful workmanship, guarantees outstanding usability and durability. The production of these tools began in the 1920s with serving cutlery, objects with very different functions that are often associated with social rituals. The first complete cutlery set was Dry, which was designed by Achille Castiglioni in 1983: with its hitherto unknown yet practical, regular, parallelepipedal shape, it is considered one of the most innovative and interesting designs of the 20th century. Nuovo Milano by Ettore Sottsass was the second service in 1987, characterized by soft, rounded lines that arose from the author's desire to create cutlery "as smooth as a pebble in the sea". After these two sets, which were of fundamental importance for the renewal of Italian cutlery design, the catalog was enriched with more and more new projects. From then on, it was not only the design and style that characterized the selection, but also the assortment, ranging from the basic types suitable for a casual and informal table to the increasingly extensive offerings that met more classic and refined needs.

# Pots and pans

INTRODUCTION

From private gourmets to absolute beginners in the art of cookery, Alessi offers a range of cookware for all tastes and needs. The choice is simple, you just need to consider the type of cooking, your skills as a chef, the frequency of use and the number of guests you need to cook for - and finally, of course, your personal taste. Alessi cookware is made from various metals: stainless steel, copper, cast iron, Trilamin, magnetic steel and aluminium with a non-stick coating. The latter three materials are used to produce appliances that are "easier" to handle, better adapted to different dietary requirements and more suitable for the new heat sources in the kitchen, such as induction hobs.

# Bar & Wine

INTRODUCTION

Alessi has always specialized in the field of bar and wine service items. The first catalogs of the 1920s and 1930s reveal a variety of articles, from jiggers to shakers, to ice buckets. The 870 shaker and bar accessories designed by Carlo Mazzeri and Anselmo Vitale were selected in 1957 for the 11th Milan Triennale and are still produced today, contributing to the debate on the emerging Italian design scene. In 1979, Ettore Sottsass designed a Boston cocktail shaker, still considered the shaker par excellence. In the following decades, several other designers tackled the project of these objects, offering ever-new solutions and possibilities, up to the recent The Tending Box: a collection dedicated to cocktail preparation, designed by Giulio Iacchetti with the consultation of bartender Oscar Quagliarini.

# Small Furniture and accessories

There are certain aspects of our products that are easier to appreciate, such as those related to form, and there are other more hidden but equally important qualities that make it possible to get in sync with the products. This is how you can discover that even a basic coffee table or a lamp are melting pots where ancient and modern stories, technical solutions and formal expressions, rational speculations and crazy thoughts merge. An object, like a person, needs to be known in order to decide whether to love it. The collection of small furnishings offered by Alessi showcases the multifaceted creativity of some of the most vibrant designers in contemporary design, including Richard Sapper, Philippe Starck, Jasper Morrison, David Chipperfield and the Campana Brothers.

# Bathroom Accessories

INTRODUCTION

In 1992, Alessi presented an accessory for the bathroom for the first time: the Merdolino toilet brush by Stefano Giovannoni resembled a poetic reinterpretation of a pretty little houseplant. Massimo Giacon has taken a similar approach to the Mr. Cold project, a soap dispenser that the designer has given the features of a bizarre, chilled figure. For those who instead love objects with a minimalist style, the Alessi catalog offers the Birillo series designed by Piero Lissoni: a complete collection of bathroom accessories that encompasses all the themes to meet the many needs and gestures associated with this domestic environment. Small furnishing accessories such as the Babà laundry stool by Stefano Giovannoni complete the range.

# Home Fragrances and Diffusers

Born from the versatile talent of Marcel Wanders, The Five Seasons is a complete collection of objects for home fragrance. Four fragrances correspond to the seasons of the year and their characteristic perfumes. The fifth corresponds to transcendence, which Wanders associates with deep black, the color chosen to identify all related products. Alessi has created these fragrances in collaboration with one of the leading perfume makers of Grasse, the French town known worldwide for its production of flowers and fragrances. Five perfumes that inspire enveloping sensory experiences for which Wanders has chosen evocative names: "Brrr" for the cold Winter season, "Ahhh" for the marvels of Spring, "Hmm" for the bounty of Summer, "Grrr" for the poetry of Autumn and "Shhh" for the mystery of transcendence.

# Home decor

There are themes linked to such a traditional and shared imagery that tackling them anew constitutes a compelling challenge. Christmas and everything that revolves around it is one of these, with all the objects relating to its celebration: the decorations, the baubles for the Christmas tree, the crib… To go beyond these traditional canons and redesign these objects Alessi has worked with a group of creatives from various fields: from artists Massimo Giacon and Marcello Jori, to designers Michel Boucquillon and Donia Maaoui, to the eclectic Elena Salmistraro, for a collection of special objects, just like the moment they are dedicated to.

# BM09 - Bark Crib

Design | Boucquillon & Maaoui
Year | 2018

**Crib.**
18/10 stainless steel and gold plated steel.

| BM09 Steel | BM09 W White | BM09 GD Gold plated |

# Pet Accessories

INTRODUCTION

A collection of items for our four-legged friends, designed to meet the needs of dogs and cats of all sizes: from bowls to food containers, from hygienic bag holders to clothes pegs for closing food bags and new types such as the multifunctional Petnic container designed by Miriam Mirri, which can be converted into two bowls for water and food if required. Each piece is made from high quality, safe and durable materials to ensure the maximum well-being of the animals and to help their owners care for them in a relationship of affection, understanding and sometimes even mutual learning.

# Objets-bijoux

How can we translate those small actions of everyday domestic life into objects of evocative and noble design, much like a piece of jewelry? Elegant and somewhat mysterious, the Objets-bijoux serve a function and are designed as jewelry, to be worn or carried. Intriguing items thanks to their dual nature: practical and decorative at the same time. The Objets-bijoux have evocative shapes like leaves, hearts, ruffles, droplets… and precisely for this reason, their function is often not immediately Recognizable. It is hard to grasp at first glance that these sinuous, organic and natural shapes are actually bottle openers, spaghetti-measures, nutcrackers or orange peelers. A galaxy of functional objects, perfect as a gift for yourself and for your loved ones.

# Jewelry

INTRODUCTION

The Alessi catalog offers two "workshop jewelry" collections for lovers of design and refined metalwork.

Original and industrial, figurative and abstract, gold and black: with the Venusia collection, Elena Salmistraro creates a visual language in which the juxtaposition of textures, colors and geometries is enhanced by the various metalworking processes - from Etruscan granulation to deep drawing.

Mario Trimarchi's jewelry, which consists of a series of small, rectangular metal plates that look like playing cards and create fascinating reflections and shadows on the skin and in the surrounding space, speaks a completely different language.

# ESA01 - Lorica

Design    Elena Salmistraro
Year      2022

**Necklace.**
Steel, coated with hypoallergenic PVD.

ESA01

ESA01 – Gold and black. Limited edition of 350 numbered copies and 3 author's proofs.

# Limited Editions

Dedicated to lovers of unique and exclusive objects, a selection of projects between art and design, as surprising and desirable as a painting, a sculpture or a poem. The objects designed by some of the most interesting international designers, from Alessandro Mendini to Philippe Starck, which are offered by Alessi in a numbered edition, form a constellation of precious and expressive artefacts.

For collectors who make no distinction between fantasy, beauty and design.

# Tea & Coffee Piazza

## Tea and coffee sets.

Ten international architects, including Michael Graves, Hans Hollein, Richard Meier, Aldo Rossi and Robert Venturi, were involved in the "Tea & coffee piazza" study led by Alessandro Mendini and presented in 1983. The aim of the project was to scour the international architecture scene for talented individuals who are able to rethink the design of objects for the home. The common theme given to the architects was a tea and coffee service designed as a "piazza" on which the coffee pot, teapot and other elements become micro-architectures. Made of silver, the 99 pieces in the Tea & coffee piazza series are still considered milestones of contemporary design today.

TCPYAMASHI – Tea and coffee set in 925 ‰ silver (on request).

# Tea & Coffee Towers

## Tea and coffee sets.

In 2003, Alessi presented the results of the Tea & coffee towers study curated by Alessandro Mendini at the Architecture Biennale in Venice. This action set a precedent in the history of Alessi: it was called Tea & coffee piazza and took place between 1979 and 1983, also led by Mendini. Twenty-two international architects were involved in the new project - including David Chipperfield, Zaha Hadid, Toyo Ito, Thom Mayne, Jean Nouvel, Kazuyo Sejima and Ryue Nishizawa. They were invited to explore a particularly important theme in the history of applied arts and social rituals: the tea and coffee service. An emblematic theme that is suitable for translating the world views and languages that these designers incorporate into their architecture onto a small scale. The result was extraordinary: services with a very diverse design language, rich in new cultural, aesthetic and technological impulses.

# Books

THE DREAM FACTORY. Alessi since 1921 - Alberto Alessi looks back on a century of design and shows how the company has become an international benchmark. Through anecdotes and stories, Alberto Alessi describes the special nature of the company: as an industrial research laboratory in the field of applied arts, whose task is to mediate between the most advanced forms of expression of international creativity and the wishes, the "dreams" of the public.

DESIGN INTERVIEWS - A series of interviews published jointly by Museo Alessi and Edizioni Corraini to discover some authors from the world of design through direct accounts of their experiences. Each volume, which comes with a DVD, contains the transcript of the interview in Italian and English. The author and director of the video interviews is film-maker Anna Pitscheider.

OGGETTI E PROGETTI - Published on the occasion of the exhibition "Oggetti e Progetti. Alessi: History and Future of an Italian Design Factory", which was on display at the Neue Sammlung in Munich in 2010, this catalog traces the history of Alessi by reviving the past through twelve "new instances", twelve key themes entrusted to twelve designers who hypothesized possible developments in the company's research.

DE TRUFFLE - Il Design Alessi incontra il Tartufo Bianco d'Alba - The De Truffle project was developed by Alessi over the course of two years in collaboration with the International White Truffle Fair of Alba, to create a kit of items dedicated to this exquisite underground mushroom.
